Study on the regional added value of the KKL

The Culture and Convention Center Lucerne (KKL) is interested in the regional added value of its venue. The Institute for Systemic Management and Public Governance at the University of St. Gallen is mandated to conduct a study on the regional added value of the KKL including cultural events and congresses. Besides cashflows caused by the event organizers the expenditures caused by the participants of congresses in Lucerne play a crucial role within the analysis. During the coffee breaks short questionnaires will be distributed and collected by assistants.

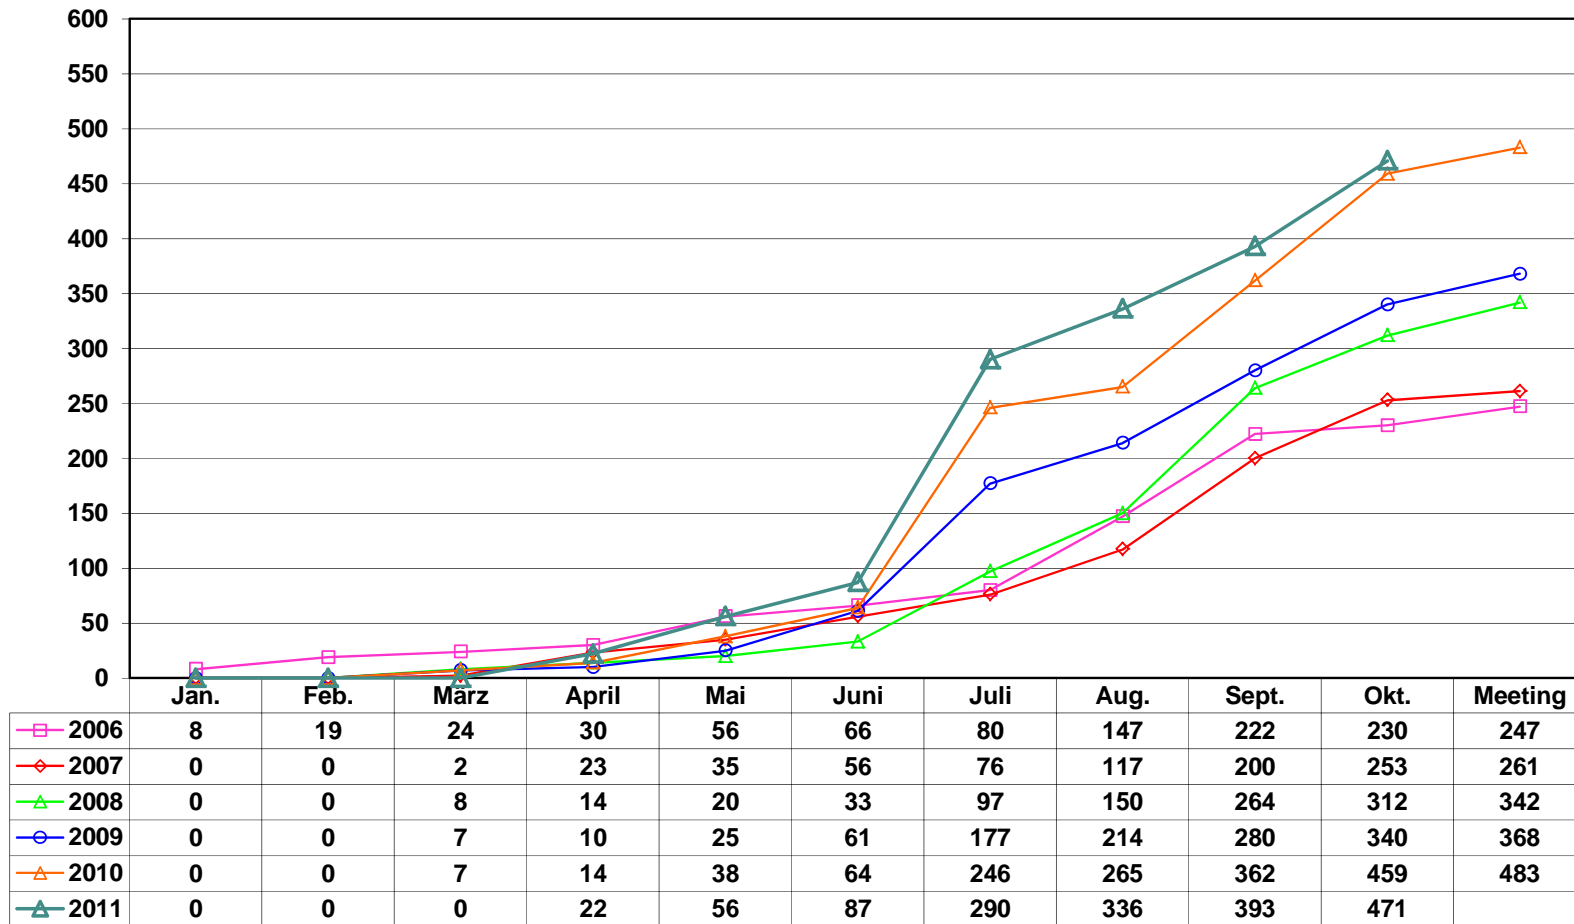

To support the study we kindly ask for your assistance.
