

European Project BIOSOLUDOE

Innovative IPM Strategies for Sustainable Agriculture
2025-2028

Goal

To design innovative IPMS strategies and boost biocontrol in the SUDOE region

How

10 partners
3 countries
5 regions
5 living labs
1,8M€ budget

The process

- Identify culture-pathogen pairs
- Identify existing products in market, with efficiency gain margin
- Set up 5 Living Labs, exchange experiences and co-design pathways
- Test on 2-3 productive plots per pathogen pair
- Disseminate results, train and receive feedback from farmers

Target groups

- ➔ Farmers and farm advisors
- ➔ Biosolutions companies
- ➔ Technical institutes
- ➔ Institutional bodies

WG1

Diagnosis and Strategy

WG 2

Living Labs:
field testing

WG 3

Results dissemination
